

## **TIPS FOR YOUR COMPOST**

### **Did you know...?**

- Placing **one single sheet of newspaper** at the bottom of your compost bin will help to loosen the composted material which will help to ensure your bin gets emptied.
- Stirring your composted material shortly before the pick up day will also help to ensure that your compost bin gets emptied.
- Please check to see that your lid is shut securely.
- Your compost bin is for compost only. Garbage or any other recyclables should be placed in the proper containers.
- Make sure that your bin is not obstructed by any vehicles or overhanging objects so that the garbage truck can pick up your bin safely.

Mountain View Regional Waste Management and the Town of Sundre are trying to work together to provide quality service to our residents. Thank you for your understanding and cooperation.
